

Release of Observation Coaching Information

To complete International Coaching Federation (ICF) credentialing, Center for Coaching Excellence (CCE) participants engage in an assessment of their coaching skills through recorded coaching sessions with a client. A CCE assessor listens to the participant's selected recordings and reviews the corresponding transcripts to determine that key competency applications have been demonstrated.

ICF requires submission of recordings and transcripts in their periodic audits to verify the training organization's assessor process.

By initialing below, you agree to have your Observation recordings and transcript information stored in a protected storage space and have them submitted to ICF if requested.

Client and Coach full names are not submitted to ICF.
